## Section B: Write SQL statements based on the given schema below. 5 marks for questions.

| Th | e following tables form part of a database held in a relational DBMS.  Hotel (hotelNo, hotelName, hotelAddress)  Room (roomNo, hotelNo, type, price)  Booking (hotelNo, guestNo, dateFrom, dateTo, roomNo)  Guest (guestNo, guestName, guestAddress) |  |  |  |  |  |  |  |  |
|----|--|--|--|--|--|--|--|--|--|
| 1. | List the price and type of all rooms at the Grosvenor Hotel.   |  |  |  |  |  |  |  |  |
|    |  |  |  |  |  |  |  |  |  |
| 2. | List the number of rooms in each hotel in London.  |  |  |  |  |  |  |  |  |
|    |  |  |  |  |  |  |  |  |  |
|    |  |  |  |  |  |  |  |  |  |
|    |  |  |  |  |  |  |  |  |  |
| Se | Section C: Answer the following questions.   |  |  |  |  |  |  |  |  |
| 3. | Staff (staffNo, name, address, position, salary, branchNo, bAddress)   |  |  |  |  |  |  |  |  |
|    | 3.1. Explain why the given table is not in third normal form.  |  |  |  |  |  |  |  |  |
|    |  |  |  |  |  |  |  |  |  |
|    | 3.2. Transform the given table into third normal form. Indicate the primary key for each table.  |  |  |  |  |  |  |  |  |

**4.** Derive relations from the following conceptual data model, indicate the primary keys and foreign key(s) as well. For each foreign key, state the relation it is associated with.

|                    |    |               |                | 1  |    |            |
|--------------------|----|---------------|----------------|--|----|------------|
| writes <b>&gt;</b> |    | Prescription  |                |  |    | Patient    |
| 11                 | 0* | presNo {PK}   |                | 0*   | 11 | patNo {PK} |
|                    |    |               |                |  |    | name       |
|                    |    |               |                |  |    | phone      |
|                    |    |               |                |  |    | DOB        |
| •                  |    | 0*            |                |  |    |            |
|                    |    | appears in    |                |  |    |            |
|                    |    | 11            |                | _  |    |            |
|                    |    | Drug          |                |  |    |            |
|                    |    | drugCode {PK} |                |  |    |            |
|                    |    | name          |                |  |    |            |
|                    |    | price         |                |  |    |            |
|                    |    |               | 11 0* pres  0* | 11 O* presNo {PK}  O*      appears in 11  Drug  drugCode {PK} name | 11 | 11         |

5. Answer questions based on the given enhanced Entity relationsip Model. (16 marks)

- 5.1. Is it possible for a staff to be both a supervisor and a manager? Justify your answer.
- *5.2.* Is it required that every entity instance in the Staff entity be associated with an entity instance in either the Supervisor or the Manager entity? Justify your answer.
- 5.3. List the attributes of a manager.
